Dear Sir:

I received your request for information in your certified letter dated 12/16/91.

Please be advised that Arnold Laboratories which never had over four salaried employees and shared it's facilities with a real estate office, was sold sometime in late 1983 or early 1984.

The company and its assets were purchased by HURST - Electro-Chem, and it's assets moved to their plant at 2500 San Fernando Rd. in Los Angeles, Calif.

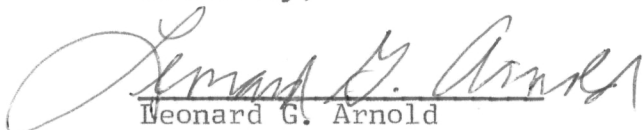

The property commonly described as 7103 Laurel Canyon Blvd., North Hollywood, Calif. was sold approximately February 1985 to Yoram M. Hassid and Ali Shapouri who after receiving appropriate government approvals built an automotive servicing center on the land.

Arnold Laboratories did chemical blending so that all of it's raw material was converted to cleaners, strippers and metal briteners. ect. These were sold to industrial plants who used them in the production and processing of their products. I do not know how they disposed of their used products. We rarely had to dispose of hazardous waste but when we did, we had to notify the county engineer what the composition of the waste was and then we transported it to the Calabassas land fill which was the last approved site in our area at the time we sold the business.

Since both Arnold Laboratories and the property were sold many years ago we no longer have records available.

Hoping the above information satisfies your needs, I am.

Sincerely,

Leonard G. Arnold
